I am partner in the corporate team, specialising in refinancing and restructuring matters.

I bridge the gap between the commercial and legal worlds, working as a lawyer and strategic advisor. I have a natural ability to quickly process complex information, and clients say they appreciate that I provide unfiltered advice they might not otherwise get, even from their own management.

I have extensive knowledge and experience in asset based lending and insolvency and approach my work from the same commercial standpoint as my clients, frequently highlighting practical implications that go way beyond the legal aspects of the matter.

I also have a special interest in refinancing and restructuring matters, advising on a wide range of insolvency related assignments or assisting and advising directors of distressed companies. I am driven by the buzz of seeing an insolvent company rescued and helping my clients grow and achieve their objectives.

I am ranked in the leading legal directory, Chambers and Partners 2024.
